ABOUT

I am a Full Stack Developer with a passion for building responsive, accessible & clean UI/UX design. I possess a great curiosity & strong desire to keep learning, be creative, have a growth mindset & a positive attitude. With experience in client support, banking & law across two continents, I make an impact with my work and bring ideas to life in a meaningful & creative way. I enjoy being part of every stage of development from planning to building, debugging & deployment. Envisioning inclusive & accessible technologies that can improve & streamline lives is what inspires me the most.

SKILLS

Technical Toolkit

UI/UX design, HTML5, CSS3/SASS, JavaScriptES2022, Angular12+, ReactJS, Redux, REST API, NodeJS, MERN full-stack, SQL/NoSQL, Figma, AWS, CRMs - SalesForce & ZenDesk, Firebase, Git, GitHub, JIRA, Responsive Design & Accessibility Standards.

Core Skills

Self-motivated, collaborative, detail-oriented, growth mindset, pair programmer, creative & analytical problem solver.

Interests

Addicted to playing chess, won several chess tournaments & was the best chess player both in school & university. Love traveling, photography & learning new languages.

PROJECTS

Track Crypto - track-crypto-13d5b.web.app
- Built a cryptocurrency tracking app with React, Tailwind CSS and fetched live coin data from CoinGecko API. Built user authentication and user's coin Watch list with Firebase in the backend.

RideX - ride-x.netlify.app
- Choose a ride, select pick up & drop off locations/cities. Upon selection, it will display locations on the map, list the available rides & ride cost.

Movie Night - movie-night-app.netlify.app
- Fetch movies & display them according to the user's search query. Another API call to display movie details upon specific movie clicks.

Agency Landing Page - agencylandingpage.netlify.app
- Responsive multi-page functional landing page for a small business with an about, blog, gallery & contact sections.

EDUCATION

MERN Full Stack Course | Online
Udemy Inc | Nov'22 - Jan'23
- Deep dived into MERN stack, NodeJS, Authentication, Express Framework, Databases (SQL, MongoDB), Sockets, GraphQL APIs, CI/CD, AWS.
- Built multiple projects including a project with SpaceX API to build a NASA launch system.

Full Stack Web Dev Bootcamp | Toronto, ON
Juno College of Technology | Oct'21 - Mar'22
- Deep dived into HTML, CSS, Javascript, React.js Typescript, API, AJAX, React, Git & GitHub.
- Built multiple Javascript, React.js projects with API - individually, pair programmed & in groups.

Web Development Course | Online
Udemy, Inc | May'20 - Nov'20
- Programmed a JavaScript based Google Chrome extension.
- Learned the fundamentals of HTML, CSS, Javascript & jQuery.

WORK EXPERIENCE

PayBright (Resolution Department) | Toronto, ON
Client Support Specialist | Oct'21 - Present
- Use AWS as PaaS/IaaS & Salesforce CRM daily to engage in 500+ calls weekly to collect 'Promise to Pay' from clients across Canada.
- Consistently meet the collections target of about $15,000 to $20,000 on a monthly basis.

Ontario Covid-19 Vaccine Portal | Toronto, ON
Vaccination Appointment Services | Apr'21 - Oct'21
- Used AWS as PaaS/IaaS & Salesforce CRM daily to book 1200+ vaccinations appointments across Ontario over the phone.
- Assisted seniors, immunocompromised & technologically challenged individuals ensuring they have a high level of customer service.

McCague Borlack LLP | Toronto, ON
Junior Lawyer | Dec'19 - May'20
- Drafted 30+ agreements, petitions & expert report summaries. Researched current legal positions & precedent cases relevant to a case.
- Trusted to serve as the junior fall back person to my seniors when they couldn't make it to an initial client intake, client meeting or a court hearing.
